The SFO will use the "Adjusted Family Income" (AFI) mechanism as the means test to assess the eligibility of a family for student financial assistance and its assistance level. The AFI mechanism is based on the following formula:

$$\text{AFI} = \frac{\text{Gross annual income of the family}}{\text{Number of family members} + (1)}$$

- Gross annual income of the family includes the annual income of the applicant and his/her spouse; 30% of the annual income of unmarried child / children residing with the family if applicable; and the contribution from relatives / friends if applicable.
- The members of a family normally refer to the applicant, his/her spouse, unmarried child / children residing with the family and the dependent parent(s) who are supported by the applicant and/or his/her spouse.
- For single-parent families of 2 to 3 members, the "plus 1 factor" in the divisor of the AFI formula will be increased to 2.
